SUMMARY

Product engineer who has shipped SaaS for clinics, a national regulator, and a UK invoicing platform. I take products from discovery and UX through full-stack delivery, turning complex business workflows into practical software. 5+ years across SaaS, ERP, healthcare, HR, invoicing, retail, and marketplace products, building with React, Next.js, TypeScript, PostgreSQL, and Supabase.

CORE SKILLS

Product & Delivery: Product discovery, requirements analysis, roadmap support, stakeholder management, Scrum/Agile, workflow design, user stories, acceptance criteria, design systems, usability audits
Technical: React, Next.js, TypeScript, JavaScript, Express.js, PostgreSQL, SQL, Supabase, REST APIs, Tailwind CSS, LLM/AI integration, responsive UI, accessibility (WCAG)
Tools & Quality: Git, CI/CD, Docker, Jest, Playwright, Figma, Storyblok

PROFESSIONAL EXPERIENCE

Senior Software Engineer | BroadReach (Remote, Full-time) **Sep 2025 - Present**

- Delivered the EFDA Regulatory KPI Dashboard end to end, replacing manual spreadsheet reporting with live measurement of 140 KPIs, including drill-downs, across 4 modules.
- Worked with domain experts to define reporting logic, mapped ERIS data, wrote SQL reporting queries, and built the production Next.js interface used by managers.
- Designed the dashboard to surface not only missed targets but the underlying drivers, making performance gaps easier to investigate and act on.

IE Network Solutions | Addis Ababa, Ethiopia (On-site) **Dec 2024 - Jun 2026**

Product Design Lead **Jul 2025 - Jun 2026**

- Served as Product Owner for Selamnew Operations, an enterprise operations platform of 7 main modules including SCM, project management, finance, inventory, and master data; owned the backlog, prioritized requirements, and aligned stakeholders with engineering.
- Led product design across CRM, talent, supply chain, and other enterprise platforms, shaping workflows from discovery through high-fidelity design and handoff.
- Ran UX audits, prototyping, and design-system work to reduce friction, improve consistency, and give engineering teams clearer implementation guidance.

Senior Business Analyst & Scrum Master **Dec 2024 - Jun 2025**

- Drove the design and delivery of an ERP SaaS platform by translating business processes into functional requirements, user stories, and technical workflows.
- Facilitated agile ceremonies, clarified scope and dependencies, and kept product, design, and engineering aligned on delivery priorities.

Product Engineer | MCS Merseyside | Merseyside, UK (Remote, Part-time) **Jan 2024 - Jun 2026**

- Built and refined LocalLoop, a Next.js and Supabase platform for invoice intake and clearing workflows, combining full-stack delivery with product and UX improvements.
- Built an invoice clearing management system covering invoice intake, validation, matching, and clearing workflows.
- Developed responsive TypeScript components and a reusable Storyblok component library using Web Awesome, improving consistency and maintainability.

Senior Full-Stack Developer, Acting CTO (started as UI/UX Designer) | Suisse Clinic (On-site) **Apr 2021 - Dec 2024**

- Designed and built a clinic management interface with React, translating clinical and administrative workflows into responsive screens; improved operational efficiency by 30% and patient satisfaction by 25%.
- Architected a multi-tenant HR platform for onboarding, leave, payroll-related workflows, and performance management, reducing manual administrative overhead by 40%.
- Defined technical direction, API and database design, deployments, and engineering practices while mentoring developers and supporting users through adoption.

Frontend Engineer & UI/UX Designer | Fairway | Helsinki, Finland (Remote, Contract) **May 2023 - Feb 2024**

- Designed and developed 5+ React/Next.js web applications and translated 30+ wireframes into responsive, WCAG-aware interfaces.
- Improved load times by 35% and user engagement by 25% through front-end optimization and UX refinement.
- Streamlined design-to-development workflows, reducing delivery time by 15% while maintaining strong client satisfaction.

PRODUCTS (ARADA TECH)

AradaRent (rent.aradatech.com) and **Arada Mart** (mart.arada.app): live multi-tenant SaaS products, designed and built end to end; Arada Mart is a tablet-first POS with offline sync, FIFO costing, and inventory control.

EDUCATION & CERTIFICATIONS

BSc Computer Science, Mekelle University | 2016 - 2020 | CGPA: 3.7
AWS Certified Cloud Practitioner | Agile Scrum Master | Meta Certified React Developer | IBM Enterprise Design Thinking
Languages: English (C1)
